input.xlsx

Pull the LPs in

/import-lps

- ✓ Reads the sheet, creates one file per investor
- ✓ Skips rows already imported
- ✓ No research yet — that is step 2

Alternative

Skip the sheet and type /research <LP name> for only one LP

> /import-lps

- Step 0 – converting input.xlsx:
Ran 1 shell command
- 11 fresh rows – you've added new LPs since the wipe. Reading them:
Made 1 scratchpad edit +5 -5, read 1 file, ran 1 shell command
- All 11 LPs imported – the fresh pipeline is live.

Company	Slug	Contact	Status
VBV-Pensionskasse AG	vbv-pensionskasse-ag	Andreas Zakostelsky	imported
Valida Pensionskasse AG	valida-pensionskasse-ag	Martin Sardelic	imported
APK Pensionskasse AG	apk-pensionskasse-ag	Beate Wolf	imported
Bonus Pensionskasse AG	bonus-pensionskasse-ag	Michael Scherhammer	imported
Allianz Pensionskasse AG	allianz-pensionskasse-ag	Andreas Csurda	imported
Raiffeisen Pensionskasse AG	raiffeisen-pensionskasse-ag	Martin Sardelic	imported – Δ shares contact with Valida, one email max
VBV Vorsorgekasse AG	vbv-vorsorgekasse-ag	Andreas Zakostelsky	imported – Δ shares contact with VBV-Pensionskasse, one email max
IBM Pensionskasse AG	ibm-pensionskasse-ag	Gerald Leberbauer	imported
Bundespensionskassa AG	bundespensionskassa-ag	Marcus Klug	imported
Resaver	resaver	Beata Cseresznye	imported
Nestle Pensionsfonds AG	nestle-pensionsfonds-ag	–	imported – Δ no contact provided

Each has a stub file in /lps/ and a pipeline row at stage imported, scores unset. output.xlsx was regenerated (11 active LPs) and input.xlsx synced with the stage column – if either is open in Excel, close and reopen to see the changes.

Next step: /research <Company> to fill in strategy, bridge angles, and a score for each – worth starting with the ones you plan to contact first.

Research LPs

```
/research <LP name>
```

```
/research all
```

- Who they are and what they invest in
- The right person to write to
- 3 personal angles for the email
- A fit score from 1 to 100

```
> /research VBV-Pensionskasse AG

Draft emails per LP

```
/draft <LP name>  
/draft <LP name> 2
```

How a draft is built

- Opens with building rapport
- Uses a proven structure from past emails
- One angle per draft — 1, 2 or 3 (A, B, C)

The review packet

```
/review-packet
```

One file, every pending email

nothing to hunt for

Summary table on top

who, angle, length

Read on screen or print
