

Review Packet — 2026-07-08

1. APK Pensionskasse AG — Variant A

Subject: Valori Capital, niche European private credit strategies, first vintage

Dear Mr. Brenner,

I am reaching out from Valori Capital.

APK has publicly named private debt as its next strategic focus, citing "restrictive lending conditions" as the opportunity.

You already have an established alternatives programme, so the operational setup is in place.

Valori focuses on exactly this space, bilateral European real estate-backed credit in the mid-market, where restrictive lending is creating deals.

I wanted to introduce our firm as you bring on managers in niche European private credit strategies.

- First vintage, targeting €400M by April 2027. €50M anchor committed, with €1M GP capital invested alongside LPs.
- Distressed credit and special situations backed by European real estate. Bilateral deals in the €10M to €50M range, a segment too fragmented for the largest international funds.
- 50+ years combined experience across the team. €1.35B previously underwritten at a 19% IRR.
- €100M+ proprietary pipeline, mostly bilateral. Target: 15%+ net IRR to LPs.

APK's long-term approach to investing aligns with how our partners think. We direct a significant portion of fund profits to society and believe integrity matters as much as returns.

Our deck is attached.

If a specialised European real asset debt manager aligns with your current mandates and interests, I would welcome a brief call.

Kind regards, Jozef Martinak Partner, Valori Capital

2. APK Pensionskasse AG — Variant B

Subject: Valori Capital, niche European private credit strategies, first vintage

Dear Mr. Brenner,

I am reaching out from Valori Capital.

APK has identified the European real estate value-added segment as a key opportunity, pointing to refinancing pressures and a weak transaction market.

Your 2025 shift toward European assets and away from USD positions tells a clear story about where you see value right now.

That conviction in European credit is exactly where we operate. I wanted to introduce our firm as you look at niche European private credit strategies that fit that direction.

- First vintage, targeting €400M by April 2027. €50M anchor committed, with €1M GP capital invested alongside LPs.
- Distressed credit and special situations backed by European real estate. Bilateral deals in the €10M to €50M range, a segment too fragmented for the largest international funds.
- 50+ years combined experience across the team. €1.35B previously underwritten at a 19% IRR.
- €100M+ proprietary pipeline, mostly bilateral. Target: 15%+ net IRR to LPs.

APK's Delta framework for sustainable investing shows a thoughtful, values-driven approach. Our partners work the same way and give back a significant share of profits to society.

Our deck is attached.

If a specialised European real asset debt manager fits your mandate, I would welcome a brief call.

Kind regards, Jozef Martinak Partner, Valori Capital

3. Bonus Pensionskasse AG — Variant A

Subject: Valori Capital, niche European private credit strategies, first vintage

Dear Mr. Gligo,

I am reaching out from Valori Capital.

You have spoken publicly about infrastructure debt being a long-term component of the Bonus portfolio and about valuing protection through collateral and strong covenants.

You already work with multiple managers in this space, so the asset class is familiar. That would make Bonus one of the few Austrian pension funds where this conversation is a natural fit.

I wanted to introduce our firm as you consider niche European private credit strategies.

- First vintage, targeting €400M by April 2027. €50M anchor committed, with €1M GP capital invested alongside LPs.
- Distressed credit and special situations backed by European real estate. Bilateral deals in the €10M to €50M range, a segment too fragmented for the largest international funds.
- 50+ years combined experience across the team. €1.35B previously underwritten at a 19% IRR.
- €100M+ proprietary pipeline, mostly bilateral. Target: 15%+ net IRR to LPs.

As a UN PRI signatory, Bonus invests with a long-term view that our partners share. We give back a significant share of profits to society and believe the best deals are built on shared values.

Our deck is attached.

If a specialised European real asset debt manager fits your mandate, I would welcome a brief call.

Kind regards, Jozef Martinak Partner, Valori Capital

4. Bonus Pensionskasse AG – Variant B

Subject: Valori Capital, niche European private credit strategies, first vintage

Dear Mr. Gligo,

I am reaching out from Valori Capital.

Bonus has built an alternatives programme across infrastructure debt, European real estate and private debt, working with multiple managers in the space.

Your emphasis on bilateral structures with collateral and covenant protection stands out. This is exactly how our deals are structured.

The recent fair-finance merger shows you are actively growing this part of the portfolio.

I wanted to introduce our firm as you look at niche European private credit strategies.

- First vintage, targeting €400M by April 2027. €50M anchor committed, with €1M GP capital invested alongside LPs.
- Distressed credit and special situations backed by European real estate. Bilateral deals in the €10M to €50M range, a segment too fragmented for the largest international funds.
- 50+ years combined experience across the team. €1.35B previously underwritten at a 19% IRR.
- €100M+ proprietary pipeline, mostly bilateral. Target: 15%+ net IRR to LPs.

Bonus holds the Austrian Environmental Label for sustainable financial products. Our founding partners share that sense of responsibility and direct a significant share of profits back to society.

Our deck is attached.

If a specialised European real asset debt manager interests you, I would welcome a brief call.

Kind regards, Jozef Martinak Partner, Valori Capital

5. Ceska sporitelna penzijni – Variant A

Subject: Valori Capital, niche European private credit strategies, first vintage

Dear Mr. Vosicky,

I am reaching out from Valori Capital.

Ceska sporitelna penzijni launched Fond pro budoucnost in January 2025, one of the first alternative pension funds in the Czech market.

You have already moved past the licensing stage and broadened the fund's investment limits, which tells me this is an active mandate, not just a regulatory option.

With fees waived through 2026, now is the window to build your manager roster.

I wanted to introduce our firm as you look at niche European private credit strategies for that fund.

- First vintage, targeting €400M by April 2027. €50M anchor committed, with €1M GP capital invested alongside LPs.
- Distressed credit and special situations backed by European real estate. Bilateral deals in the €10M to €50M range, a segment too fragmented for the largest international funds.
- 50+ years combined experience across the team. €1.35B previously underwritten at a 19% IRR.
- €100M+ proprietary pipeline, mostly bilateral. Target: 15%+ net IRR to LPs.

As part of Erste Group, your fund sits within a long-term governance framework. Our founding partners share that approach and direct a significant share of profits to society.

Our deck is attached.

If a specialised European real asset debt manager fits your mandate, I would welcome a brief call.

Kind regards, Jozef Martinak Partner, Valori Capital

6. Ceska sporitelna penzijni – Variant B

Subject: Valori Capital, niche European private credit strategies, first vintage

Dear Mr. Vosicky,

I am reaching out from Valori Capital.

The 2024 Czech pension reform opened alternative investments to pension companies for the first time, and Ceska sporitelna penzijni was one of the first to act with Fond pro budoucnost.

As the largest pension company in the market, you have the scale to build a serious alternatives programme from the start.

That combination of first-mover status and market position makes this a good time to talk.

I wanted to introduce our firm as you put together your manager roster for niche European private credit strategies.

- First vintage, targeting €400M by April 2027. €50M anchor committed, with €1M GP capital invested alongside LPs.
- Distressed credit and special situations backed by European real estate. Bilateral deals in the €10M to €50M range, a segment too fragmented for the largest international funds.
- 50+ years combined experience across the team. €1.35B previously underwritten at a 19% IRR.
- €100M+ proprietary pipeline, mostly bilateral. Target: 15%+ net IRR to LPs.

As part of Erste Group, your fund benefits from a governance framework built for long-term decisions. Our partners share that view and direct a significant share of profits to society.

Our deck is attached.

If a specialised European real asset debt manager fits your mandate, I would welcome a brief call.

Kind regards, Jozef Martinak Partner, Valori Capital

7. Grawe Group — Variant A

Subject: Valori Capital, European real asset debt, first vintage

Dear Mr. Scheitegel,

I am reaching out from Valori Capital.

Grawe runs its own real estate platform through Grawe Immobiliengruppe, with holdings across Austria and Southeast Europe.

That kind of direct real asset capability is rare among European insurers, and it means your team already knows how to evaluate property-backed deals.

A specialised bilateral credit manager working in the same space should be a straightforward conversation.

I wanted to introduce our firm as you look at European real asset debt strategies.

- First vintage, targeting €400M by April 2027. €50M anchor committed, with €1M GP capital invested alongside LPs.
- Distressed credit and special situations backed by European real estate. Bilateral deals in the €10M to €50M range, a segment too fragmented for the largest international funds.
- 50+ years combined experience across the team. €1.35B previously underwritten at a 19% IRR.
- €100M+ proprietary pipeline, mostly bilateral. Target: 15%+ net IRR to LPs.

Grawe was founded in 1828 on Archduke Johann's principle of mutual responsibility. You invest without external shareholder pressure and think in decades. That is how our partners operate too. We direct a significant share of profits to society and hold integrity as a core value.

Our deck is attached.

If a specialised European real asset debt manager fits your mandate, I would welcome a brief call.

Kind regards, Jozef Martinak Partner, Valori Capital

8. Grawe Group — Variant B

Subject: Valori Capital, European real asset debt, first vintage

Dear Mr. Scheitegel,

I am reaching out from Valori Capital.

Grawe has completed three acquisitions in the last 18 months, from Prime Insurance in Cyprus to LIGA in Armenia to a major property portfolio in Graz.

That pace tells me the group has real interest in putting capital to work in new areas.

With your existing real estate holdings through Grawe Immobiliengruppe, European real estate-backed credit is familiar ground.

I wanted to introduce our firm as you look at European real asset debt strategies.

- First vintage, targeting €400M by April 2027. €50M anchor committed, with €1M GP capital invested alongside LPs.
- Distressed credit and special situations backed by European real estate. Bilateral deals in the €10M to €50M range, a segment too fragmented for the largest international funds.
- 50+ years combined experience across the team. €1.35B previously underwritten at a 19% IRR.
- €100M+ proprietary pipeline, mostly bilateral. Target: 15%+ net IRR to LPs.

As a mutual insurer built on the idea that "in the unity of many lies the power that brings about good," Grawe thinks in decades, not quarters. Our partners share that view and direct a significant share of profits to society.

Our deck is attached.

If a specialised European real asset debt manager fits your mandate, I would welcome a brief call.

Kind regards, Jozef Martinak Partner, Valori Capital

9. Vienna Insurance Group (VIG) – Variant A

Subject: Valori Capital, European real asset debt, first vintage

Dear Mr. Lahner,

I am reaching out from Valori Capital.

VIG already carries meaningful property and lending exposure across its portfolio.

That familiarity with real asset credit means a conversation about a specialised manager in this space could be the natural next step.

I wanted to introduce our firm as you look at European real asset debt strategies.

- First vintage, targeting €400M by April 2027. €50M anchor committed, with €1M GP capital invested alongside LPs.
- Distressed credit and special situations backed by European real estate. Bilateral deals in the €10M to €50M range, a segment too fragmented for the largest international funds.
- 50+ years combined experience across the team. €1.35B previously underwritten at a 19% IRR.
- €100M+ proprietary pipeline, mostly bilateral. Target: 15%+ net IRR to LPs.

VIG's sustainability bond programme and net-zero commitment reflect values that our founding partners share. We direct a significant portion of fund profits to society.

Our deck is attached.

If a specialised European real asset debt manager fits your current mandate, I would welcome a brief call.

Kind regards, Jozef Martinak Partner, Valori Capital

10. Vienna Insurance Group (VIG) – Variant B

Subject: Valori Capital, European real asset debt, first vintage

Dear Mr. Lahner,

I am reaching out from Valori Capital.

VIG launched its evolve28 strategy this year with a focus on profitable growth and a rising dividend, coming off a record year.

With the Nürnberger acquisition expanding your European footprint, VIG is clearly in deployment mode across new markets and asset classes.

That is a good moment to look at a specialised manager in a segment where the largest funds do not serve.

I wanted to introduce our firm as you consider European real asset debt strategies.

- First vintage, targeting €400M by April 2027. €50M anchor committed, with €1M GP capital invested alongside LPs.
- Distressed credit and special situations backed by European real estate. Bilateral deals in the €10M to €50M range, a segment too fragmented for the largest international funds.
- 50+ years combined experience across the team. €1.35B previously underwritten at a 19% IRR.
- €100M+ proprietary pipeline, mostly bilateral. Target: 15%+ net IRR to LPs.

VIG's UN Global Compact membership shows a long-term orientation that our partners share. We hold integrity as a core value and give back a significant share of profits to society.

Our deck is attached.

If a specialised European real asset debt manager fits your mandate, I would welcome a brief call.

Kind regards, Jozef Martinak Partner, Valori Capital
